

ULTIMATE SMART

Your Smart Home Solution

What is a smart home?

Smart home (or Home Automation) is an internet-enabled setup that connects various appliances and devices across your home for enhanced living, working, and entertaining.

Even better, you can control your appliances from your app on phone, tablet, or laptop and also via voice commands! A smart home system allows you to monitor and control your connected space and products such as lighting, security, TVs, fridges, and much more. It saves power by automatically powering off the main system when no one is in the room.

Who needs a connected home?

Whether you're a beginner or a smart home expert, we have the product and expertise to get you started or enhance your connected home journey. From the front door to the backyard, we'll show you how you can take advantage of connected home tech.

How do I start and what do I need?

Our expert staff can customize your home to smart home that fits your needs, space, and budget. We also provide flexibility with a range of financing options. Your basic requirements are:

Wi-Fi to run all smart home products within your connected home.

Smart Device (phone, tablet or laptop,) to control your new devices via required apps.

Smart home products. The Ultimate team is ready to guide you to find the right products for your needs.
